**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22-27,31 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Posch (EP 504995) in view of Cook (5,067,858). Posch discloses a nail cutting insert (3) having a cutting surface (4) which is seated in a rectangular pocket (6) of a tool holder body (1). The cutting insert is made of a hard material and a mounting bolt (2) is threaded through a hole (5). Figures 4 and 5 show that different shapes of cutting inserts are useable but correspondingly shaped pockets are not disclosed. Regarding claims 26 and 27, Posch discloses that the cutter insert has rounded edges which seat against rounded edges of the pocket. Posch does not disclose a pentagonal pocket. Cook teaches a cutting insert (52) made of a hard material which is seated in a pentagonal pocket (66) of a tool holder body (68). The insert has a hole (62) for a mounting bolt (64). The pentagonal pocket has an included angle of greater than 90 degrees to seat the angle (80) of the insert. It would have been obvious to one skilled in the art at the time of invention to seat the cutting insert of Posch in a pentagonal pocket as taught by Cook in order to strengthen the support for the cutting body in an attempt to lessen chipping of the cutting surface.

***Response to Arguments***

Applicant's arguments with respect to claims 22-27,31 and 32 have been considered but are moot in view of the new ground(s) of rejection. Applicant's arguments concerning the combination of Werner and Schretter are accepted and a new rejection is set forth to respond to the requirement that the pocket have an included angle. Posch (cited on Applicant's IDS) discloses different shapes of nail cutting inserts and motivation exists to provide different shapes of pockets to accommodate different nail cutting inserts. The teaching of Cook (previously cited in a PTO-892) is directed to cutting inserts and pockets which strengthen a cutter and provide better wear results.

Applicant's drawing correction of figure 9 is accepted.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of
